The University of Georgia College of Veterinary Medicine, founded in 1946, is dedicated to training future veterinarians, providing services to animal owners and veterinarians and conducting research to improve the health of animals as well as people. The college enrolls 96 students each fall out of approximately 500 who apply. It has more than 145 faculty members.

Through its hospital and diagnostic laboratories, the College benefits pets and their owners, food producing animals and wildlife. The laboratories safeguard public health through disease surveillance. Research conducted at the college improves the health and quality of life for companion animals and improves the productivity and health of poultry and livestock.

The University of Georgia is committed to principles of equal opportunity and affirmative action.
